

Job title:	Apprentice Welder-Fabricator
Company:	Graham Heath Construction Ltd
Salary:	Negotiable depending on experience
Hours of work:	Full-time (Monday to Friday)
Location:	Graham Heath Construction Ltd, The Old Creamery, Wrenbury Industrial Estate, Station Road, Wrenbury, Cheshire, CW5 8EX

Due to the continued success of Graham Heath Construction and the brilliant results of our previous Apprentice Intakes, an exciting opportunity has arisen. We're recruiting for an Apprentice Welder-Fabricator to join our team in Wrenbury near Nantwich. The company have previously taken on two Apprentices in the Technical Drawing Team but are now looking to transfer the success of these intakes into other areas of the business.

Key responsibilities include:

- Provide efficient and effective assistance to the manufacturing team.
- Liaise with the Technical Drawing Team to discuss building specifications.
- Assisting with fabrication and manufacturing of products from instruction and the reading of engineering drawings.
- Assisting with performing repairs on heavy duty steel equipment.
- Demonstrate continuous efforts to improve operations, decrease turnaround times & streamline work processes.
- Visually inspect fabrication work to determine compliance with standards and legalisation.
- Responsible for cleanliness and housekeeping within your area.

Personal qualities:

- Professional attitude and approach to work.
- Excellent attention to detail.
- Excellent communication skills.
- Good practical skills.
- Highly organised.
- Logically minded with good problem-solving skills.
- Friendly personality with the ability to work as part of a team and also using own initiative.

The Final Outcome

We take our Apprenticeships seriously. Joining our team as an Apprentice means you are committed to completing your training with Graham Heath Construction. We want you to hit the ground running to become a skilled individual. The ultimate aim at the end of the apprenticeship, is for you to have the ability to completely manufacture a full range of products in the workshop with minimal supervision. The successful apprentice will follow a Fabrication/Welding apprenticeship route and become skilled in sheet metal work and welding processes. The individual will develop a high level of knowledge and understanding of Engineering Technical Drawings and Specifications with the eventual goal of working independently as a skilled engineer within the team.

To Apply

This is an exciting opportunity and if you have the relevant skills and experience please apply now.
